**May 2010 to June 2014;**

**Railroad Construction Company, Paterson, NJ**

**Partial List of Projects:**

**Intern > Project Engineer**

**Phillips 66 Crude Oil Offloading Facility – Linden, NJ**

On-Site Project Engineer for this \$24.9 million project to construct a 120-rail car off-loading platform on the “40-Acre Site” at the Conoco-Phillips property. Scope of work included the construction of a 1850 ft by 100 ft concrete containment structure with over 8,300 LF of DF Track and 3,500 LF of Ballasted Track. The civil work included the development of 3-acre clay lined detention basin along with site grading and drainage. The program also included the construction of a one-story Office/Fire Pump Control Building. Responsibilities included tracking materials and equipment, assisting with schedule review and change order management.

**Prysmian – Hudson Transmission Project – Borough of Ridgefield, NJ to NYC**

Project Engineer for a portion of this \$25.1 million project that connected the PSE&G substation in Fairfield, NJ to the Con-Edison substation in Manhattan with a 3-Phase Cable System that included the construction of over 16,000 LF of specialized duct bank and ancillary manholes and transition structures. The scope of work included 2 HDD locations under River Road in Edgewater, NJ and Bellman's Creek in Fairfield, NJ as well as the temporary stabilization of a 5,000 FT rock-lined tunnel that had been out of service for over 30 years. Responsibilities included tracking materials and equipment, assisting with schedule review and change order management

**New Jersey Turnpike – Extension 14 – Exits A, B and C**

Engineering Intern for portion of NJ Turnpike Bridge Deck Reconstruction Project at exit 14b-14c of the NJ Turnpike.

**Garden State Parkway – Northern Section Spall Repairs and Pier Rehabilitation**

Engineering Intern for portion of Parkway Rehabilitation Project and spall repair work at various location of the GSP.
